

THE GENUINE AMBROXAN®

Ambroxan® was commercialized in the 1970's after an extensive research into the key olfactory molecules of natural Ambergris. We synthesize it from Sclareol which is obtained from Clary Sage plant. This natural origin provides richness and complexity to **Ambroxan®**.

MAIN ADVANTAGES:

Ambroxan® has a very clean and warm ambergris note with woody and musky tonalities. It has a radiant, exquisite and unique amber note. It is a fine fragrance by itself. The main reason why it's a key ingredient in perfumery is the effect of **Ambroxan®** on compositions. It combines extremely well with any other material, in masculine and feminine fragrances, in any application for all Perfumery areas, performing always very well.

It provides balance, warmth and harmony to the compositions, rounding them up at the same time. **Ambroxan®** enhances the volume, giving body but also softness with an outstanding tenacity even at low dosages.

Ambroxan® gives a magic touch to your fragrance. It will become more beautiful and elegant.

MAIN SPECIFICATIONS:

- Appearance: white flakes.
- Odour: Clean Ambergris, Woody, Warm, Rich.
- Purity (by GLC): 95% min.
- Natural, vegetable and renewable origin.

MAIN FEATURES:

- Stability: excellent stability in most media.
- Uses: various types of fragrances.
- Legislation: CAS No. 6790-58-5, TSCA Registered, EINECS 229-861-2, CEPA DSL.
- Halal certified.
